

VOLUME 26; NUMBER 50

CARBON, ALBERTA, THURSDAY, JANUARY 15, 1942

32.00 A YEAR; 50¢ A COPY

America's heavy sacrifices in the Philippines have served to blunt and delay Japan's long-prepared efforts to seize the British and Dutch empires. Manila's agony has protected their Indian colonies and Australasia from the annihilating blow which could have been delivered had the forces of Gen. Douglas MacArthur been unable to intercept resistance to the death.

Like the American and Filipino soldiers collapsed before the Japanese blitz, it is certain that many troops and aircraft, whose concentration upon the Singapore and Borneo fronts may soon be expected, would already be here where pressure is all ready great.

Although the Philippine defeat makes part of America suffer what little countries like Norway, Belgium and Poland already have known, this sacrifice has at least accomplished one thing:

America in sacrificing the Philippines has cleared her debt to Great Britain for delaying Hitler's plans of world conquest.

Although her loss is heavier in territorial terms than anything Britain has suffered, and, moreover, since Japanese bombs equally pitiless in human terms with the days when the hills fell upon London, America has taken her wounds proudly and will avenge them thoroughly.

With Russia handling the Reich's west and most of the Luftwaffe and the Egyptian situation progressing smoothly, Britain's situation—provided the principal Pacific responsibility is regarded as America's—is now coming into a secure form despite the steady advance of the Japanese army down the Malayan peninsula.

In the territorial world balance Britain is actually ahead for without having lost more of her own soil than the channel islands, she has won valuable Italian colonies in Eritrea and Somaliland thus insuring permanent freedom of the Red Sea passage to India.

America, however, until today the golden boy of the Allies, starts the war with two called strikes.

Without footholds of her own in the Pacific she is about to undertake the defence of the British and Dutch colonies that are the principal sources of income of their empire.

The American Philippines has been the price of the delaying action which has saved India, Burma, Malaya and Dutch Indonesia.

Hong Kong could not help Manila and Singapore has been too occupied saving herself to venture across the south China sea.

The time is probably at hand for overhauling the Pacific political situation complementary to war strategy. The first step in such a plan would be the immediate creation of American air and naval bases from Singapore southward under a permanent American flag and administration.

Even the most unregenerate isolationists will admit from Japan's behavior and ideology—being patently unable to do this and handle Germany in Europe—they will look to the United States.

Japan's defeat, like Germany's, will probably be the signal for a new period of cyclic abatement and national renaissance as Germany has demonstrated under Hitler.

The United States, which dodged

### ANNUAL MEETING OF ANGLICAN CHURCH HELD LAST WEDNESDAY NIGHT

The annual meeting of the Anglican Church, parish of Christ Church, Carbon, was held on Wednesday evening, January 17th in the church basement.

The following officers were elected for the ensuing year:

Treasurer, Frank Emery; Secretary, H.M. Isaac, R. Greenhalgh, J. Barber, J. Atkinson Jr., C.W. Smith, H. Hunt, R. Skerry and T.G. Cadman.

Vicar: Warden: C. N. Hah (pro tem).

People's Warden: W.A. Braisher. Delegate to Synod: H.M. Isaac.

Substitute delegate, C. Kay, Sunday School Superintendent: Mrs. Talbot, in place of Mrs. McNaughton who is leaving the Carbon district.

It was stated that the envelope system brought in \$46 less in 1941 than in 1940.

Light refreshments were served by the Women's Auxiliary at the close of the meeting above reported.

### VICE-PRESIDENT'S TEAM PAYS FOR CURLEUR'S LUNCH

The President-Vice President's draw at the Carbon Curling Ring has been completed and the losers were not long in paying up their debt. On Monday evening 35 members gathered in the Carbon Cafe and enjoyed a splendid lunch at the expense of the Vice-President's side, which lost the round 54 to 58.

### LETTER FROM L.B. HART

The Editor received a letter this week from L. B. Hart, Elmstead, Nova Scotia, enclosing payment for his subscription to The Chronicle.

Mr. Hart says that among the visitors from Carbon to their home at Elmstead were Ross Turnbull, Wm. Harvey, and George Cooper, and he extends a hearty invitation to other Carbon and district residents to visit them when in Nova Scotia.

long-term political commitments in Europe after World War I, cannot escape them in the Pacific this time. Security will demand far stronger insular footholds than before Japan dropped her mask.

Some bases will be provided by slow reconquest from Japan but not enough.

Japan will be difficult to down and if Britain and Holland want her held in check, they will be patently unable to do this and handle Germany in Europe—they will look to the United States to do it.

Unless, however, they proffer the same kind of states workable as a permanent plan in the form of American-owned or leased air and naval bases, the United States is likely to remain as unstable as the European.

### ANNUAL MEETING OF CARBON M.D. NO. 278 HELD JAN. 8

Reeve John R. McEwan, who is suffering from a broken knee cap, was the only member of the Council of the Municipal District of Carbon who was absent from the regular monthly meeting on January 8.

Very little business was transacted at the meeting, and a communication was read from the Calgary General Hospital advising that they will not accept patients in the isolation hospital, except in special cases.

Dick Gimbel was authorized to repair the municipal tractor and put it in shape for the coming year.

### LINE ELEVATORS URGE CEILING PRICE OF \$1.26

Uniform wheat price ceiling for all Canada of \$1.26 per bushel basis One Northern delivered Montreal is urged by a brief submitted to Ottawa this week by The North-West Line Elevators Association. The Government recently set a price ceiling for Ontario wheat of \$1.26 per bushel. The indicated ceiling for Western wheat is \$2.34 cents per bushel, unless action is taken by the Government to set a higher ceiling price.

In a submission to the Chairman of the Wartime Prices and Trade Board the North-West Line Elevators Association, to express their appreciation and thanks for your kindness in providing space for Church material, free of charge, in "The Carbon Chronicle".

In the Minutes of the General Meeting of Christ Church held last Wednesday night, a Vote of Thanks was moved, seconded and carried unanimously regarding the above.

Frank Emery, church secretary

### POLICE COURT NEWS

Norman Nash appeared in Carbon police court Tuesday afternoon, charged by Const. Amy of the R.C.M.P. with failing to stop at a local stop sign. A fine of \$5.00 and costs of \$4.00 was levied by Police Magistrate V.B. Hawkins.

In our last issue we made an error in the fine paid by Karl Schuler. He was assessed \$5 and costs and not \$1 and costs, as was reported.

### WOMEN'S AUXILIARY OF CHRIST CHURCH ELECTS OFFICERS

At a meeting of the Women's Auxiliary of the Parish of Christ Church, Carbon, on the afternoon of January 7th, the following officers were elected:

President, Mrs. P. Wheat. Vice-President, Mrs. T.G. Cadman. Secretary, Mrs. Cooper. Treasurer, Mrs. W.L. Van Loon.

It was stated that the wife of the late incumbent, Mrs. S. Evans, was very ill, and it was voted that an expression of sympathy and a cash gift from the Women's Auxiliary should be sent to Mrs. Evans.

### CRIMINAL OFFENCE TO BURN RUBBER TIRES AND TUBES

Munitions minister Howe announced Saturday from Ottawa that an order-in-council had been passed making it a criminal offence to burn, cut, destroy any rubber tyre, tube or casing.

The latest order in the government's rubber conservation program provides penalties of fines up to \$5,000 or five years' imprisonment, or both. Those in the business of reclaiming rubber are exempt. The order takes effect immediately.

### R.C.A.F. TRAINING PLANE MAKES FORCED LANDING AT R. SAYER FARM

Two English air men lost their way in a snow flurry last Monday and were forced to make a landing on the Richard Sayer farm, about six miles east of Carbon, at about 11 a.m., and remained for a few hours until they were able to get their bearings and twelve instructors from the home centre at Calgary. Mr. and Mrs. Sayer gave the boys their dinner, and they then proceeded to the nearest phone, at H.M. McNaughton's, where they communicated with Calgary. The weather cleared off in the afternoon and the plane was able to take-off the stable field with little difficulty and proceeded back to their home base.

### CARBON BONSPIEL TO BE HELD ON FEBRUARY 17-18-19

The annual bonspiel of the Carbon Curling Club will be held this year on Tuesday, Wednesday and Thursday, February 17th, 18th and 19th, accorded ceiling for Western wheat is \$2.34 cents per bushel, unless action is taken by the Government to set a higher ceiling price.

There will be two main competitions and the same will be the same as in previous years.

### APPRECIATES PUBLICITY GIVEN BY "CHRONICLE"

Dear Sir—I have been instructed to write to you by members of Christ Church, Carbon, to express their appreciation and thanks for your kindness in providing space for Church material, free of charge, in "The Carbon Chronicle".

In the Minutes of the General Meeting of Christ Church held last Wednesday night, a Vote of Thanks was moved, seconded and carried unanimously regarding the above.

Frank Emery, church secretary

### WHEAT PRICE CEILING OF \$1.26 URGED BY LINE ELEVATORS

THE NORTH-WEST LINE ELEVATORS ASSOCIATION has submitted a further memorandum to Ottawa urging that special consideration be given the disabilities under which the wheat farmer is operating in fixing a ceiling price for wheat.

THE LINE ELEVATORS are urging the Government to set the ceiling price for Western wheat at not less than \$1.26 per bushel basis One Northern delivered at Montreal in conformity with the price ceiling set on Ontario wheat. This would make the ceiling price at Fort William and Vancouver a minimum of approximately \$1.15 per bushel.

ANY farmer wishing to secure a copy of the submission of the Line Elevators Association on this subject may obtain one from any Line Elevator Agent.

### LINE ELEVATORS ASSOCIATION

### SECOND VICTORY LOAN TO BE OFFERED FEB. 16

The National War Finance Committee at Ottawa has announced that the Second Victory Loan will be offered to the public on February 16th of this year, although no other information regarding amount of loan, interest rate, or denominations have so far been made public.

### YOUNG MEN OF THE FARM

An Opportunity You Cannot Afford to Miss!!

### FARM MECHANICS SCHOOL at TROCHU

Under Dominion-Provincial Youth Training Programme

This school is now in progress and continues to February 11th. There is still room for more students. Shop work in farm motors and machinery, carpentry and blacksmithing. Ages 16 to 30.

Financial assistance toward living expenses if needed.

Report at Trochu To W. J. RIGBY, Inspector in charge

O. C. STEINBACH, Local Representative, Trochu

S. H. GANDIER, Supervisor of Schedule "E" Dominion-Provincial Youth Training Program, Parliament Bldg., Edmonton, Alta.

### ANNUAL MEETING OF CARBON RED CROSS SOCIETY

The annual meeting of the Carbon branch of the Canadian Red Cross Society will be held in the Farmers' Exchange hall on Friday evening, January 23rd, at 8 p.m. It is hoped that a large attendance will be on hand to lend their support to an organization which is vitally necessary to provide comforts and supplies to our fighting forces, and bombed-out friends in the Mother country.

### THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

While admitting that the proposed ceiling price for wheat of \$2.34 cents will not bring sufficient income to the wheat producers, Government seems reluctant to increase the ceiling price, because to do so would increase the price of flour and bread, and so would increase the cost of living of industrial labor and others, who in turn would promote demands for still higher wages.

With this in view the Seale Grain Company recently suggested that the ceiling price of \$2.34 cents might be maintained for the sale of wheat to millers, but that the Government, through its Price Stabilization Corporation, might pay farmers a price of \$1.20 for 1 Northern at Port William which would equal the 1931-32 "pool" price.

An objection to this has been raised. It is felt by some that if farmers receive \$1.20 for their wheat, that such a price would induce them to curtail the production of coarse grains and livestock, and to increase the production of wheat. This objection, I feel, that farmers can sell. A price of \$1.20 in itself, should have no effect either in increasing wheat production or in curtailing the production of coarse grains and livestock.

### WHEAT PRICE CEILING OF \$1.26 URGED BY LINE ELEVATORS

THE NORTH-WEST LINE ELEVATORS ASSOCIATION has submitted a further memorandum to Ottawa urging that special consideration be given the disabilities under which the wheat farmer is operating in fixing a ceiling price for wheat.

THE LINE ELEVATORS are urging the Government to set the ceiling price for Western wheat at not less than \$1.26 per bushel basis One Northern delivered at Montreal in conformity with the price ceiling set on Ontario wheat. This would make the ceiling price at Fort William and Vancouver a minimum of approximately \$1.15 per bushel.

ANY farmer wishing to secure a copy of the submission of the Line Elevators Association on this subject may obtain one from any Line Elevator Agent.

WORLD HAPPENINGS  
BRIEFLY TOLD

Supply Minister John Beasley said a plan for rationing of consumer goods such as clothing, as well as raw materials, was under consideration by the Australian government.

Fifty Canadian nurses, the first contingent to join the South African military nursing service, were welcomed by the mayor at the city hall in Cape Town.

The Italian council of ministers, Mussolini presiding, voted approval of a 1942-43 fiscal year budget to provide 14,152,180,000 lire for the armed forces.

It was learned in Canberra that Australia may be used as an operational base by United States and Netherlands forces in the Pacific, as well as by British Empire forces.

Canadian production of pig iron in November totalled 133,735 tons compared with 127,114 in the previous month and 109,576 in November last year, the Dominion bureau of statistics reported.

## SLIM FROCK TO WEAR AT HOME

By Anne Adams

There's a new joy awaiting you if you've never made an Anne Adams home frock before! They're especially designed for the larger figure, yet incorporate the latest fashion details. Pattern 4928 is an example. The centre panel, front and back, accents the vertical lines of your figure, and so do the dipping side sections of the bodice in front. They're cut on the bias which would be especially effective in a checked fabric. Don't you like the square neckline with its smart tail buttoning? The sleeve tabs are trimmed with buttons to match—do add the perky riccote trim! The sleeves can be either short, three-quarter or long. Let the Sewing Instructor show you how to finish easily and quickly.

Pattern 4928 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3½ yards fabric and 1½ yards riccote. Send twenty cents (20c) in coin (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermid Ave., E., Winnipeg, Man.

## Self-Sufficient In Drugs

Australia Able To Produce Practically All They Would Require. Australian medical experts believe that if overseas imports of drugs were cut off, Australia would be able to produce its own drugs from materials available in the country. Frederick Palmer, Canadian Trade Commissioner, reported. Australia already has attempted to become self-sufficient in production of drugs and medicines by obtaining them from plants and trees by experimental cultivation of such plants, he said. The physiology department of Melbourne University has been working on manufacture of medicines—the only other commodity needed to ensure Australia's self-sufficiency in drugs.

Covered Lots Of Ground. Since the Australian Air Force entered the war, its reconnaissance squadrons have flown more than 4,000,000 miles in patrols over 75,000,000 square miles of four oceans.

One typewriter built especially for the blind has only six keys.

## New Who To Ask

Officer Would Likely Have What This Soldier Wanted

When a train carrying troops to Eastern Canada stopped at Bassano, Alberta, for water, one of the lads leaped from a forward coach and ran back along the platform crying: "Is there an officer on board. I want an officer." A harassed guard raised a window and stuck out his head, hailing the soldier, who greeted him with: "Major, sir, have you got a corker?"—Maclean's Magazine.

SO YOU'RE GOING  
TO DO A PLAY?

Letters from all over the west asking for a list of plays have poured in this week, so I think we should pause right here and give that list this week.

## Non-Royalty One Act Plays

Published By Robinson  
"Not Quite Such A Goose"—Comedy, two men, three women, (30 minutes). About a regular fellow who goes to the girls but changes a bit in a hurry, when his sister brings along her girl friend.

"Who Gets The Car To-night"—Comedy, three men, two women, (30 minutes). The usual family argument about who gets the car with Dad taking command of the situation, and with a surprising ending. "Mariette and Mariette"—One man, two women. Mariette sells her beautiful hair to buy a chain for her sister's watch and Mariette's hair to buy comb for Mariette's hair.

## Non-Royalty Plays Published By French

"The Roman"—Comedy, four men, one woman, (1 act version). Two young people wish to marry but don't want their parents to know.

"Teeth Of A Gift Horse"—Comedy, two men, four women. Vases given as a wedding present by an aunt have been sold at a rummage sale. The aunt comes for a visit and the vases must be found. They are—and everything turns out fine.

"Hannah Gives Notice"—Comedy, four women. An old servant gives notice with tragic results to the family. On her return she is welcomed with open arms and everything is happy again.

"The Great High Hing"—Comedy, four women. A good characterization here depicts four women at a convention.

"At The Movies"—Farce, two men, three women. A good take-off on the movies.

"Enter Dora—Exit Dad"—Comedy, four men, 1 woman.

"The Postscript"—Comedy, one man, two women.

"Rats"—Comedy, one man, one woman. A case of mistaken identities. Good fun.

"Marriage Proposal"—Comedy, two men, one woman. Young man calls to propose to the daughter, tells father, but he and daughter start to quarrel before he has a chance to tell her. Father tells her after suitor is gone, with amusing consequences.

## Royalty Plays Published By French

"Where The Whirlwind Blows"—Drama, three women. Royalty \$5.00. A general's wife and with the male and the peasant's wife in a story about the Russian revolution.

"Joint Owners In Spain"—Comedy, four women. Royalty \$5.00. Excellent characterizations of four women in an old folks home. Lines good, and situation excellent.

"Heaven On Earth"—Relucting comedy, three men, two women. Royalty \$5.00. Good characterization. Dad and Mother prove they know best to daughter.

"Up-O-Me-Thumb"—Cockney day next one man, four women. Royalty \$5.00. Set in a laundry where one of the girls has a dream life. Dialogue may be deleted if desired.

"Sunday Costs Five Paces"—Comedy, one man, four women. Excellent characterization, girl sends her young man packing and then her friends try to get him back for her, with the usual complications. Colorful costumes. Winner of Provincial Drama Festival, Regina, May, 1941, in junior class. Suitable for all ages.

Addresses of publishers are: Robinson Plays, 128 Burgess Ave., Toronto, Ont.; Samuel French (Canada) Ltd., 480 University Ave., Toronto, Ont. Playbooks usually cost up to forty cents. If what you want is not in this list, I shall be glad to correspond with anyone if a self-addressed stamped envelope is enclosed in letter. Not send this time—Mary Ellen, Box 326, Regina.

Japanese radio listeners must pay a fee of approximately 25 cents a month.

## REG'LAR FELLERS—Who's Polite?

## LIFE'S LIKE THAT

By Fred Neher

Production of Lee-Enfield rifles is being built up to a capacity in excess of 200,000 per year in a Canadian government-owned factory.

## FLYING SCHOOL GRADUATES

Among the graduates who received their Pilot's Wings at No. 10 Service Flying Training School, Dauphin, Manitoba, on Friday, December 19, were the following groups of Manitoba and Alberta boys. The presentation was made by Squadron Leader C. P. Herington, Chief Ground Instructor at the School. The names of the young pilots from left to right are:

A. J. Dolding, Winnipeg, Man.; D. M. Matheson, Brandon, Man.; D. W. McLachlan, Virden, Man.

Back row: H. A. Slachhouse, Holden; M. C. Hyatt, Edmonton; J. W. N. Harley, Edmonton; L. W. Woolf, Hill Springs; J. K. A. Haslop, Edmonton; R. G. Tyslop, Edmonton; A. W. Sternberg, Coonout. Front row: J. W. Miller, Edmonton; J. C. Leslie, Calgary; E. G. Booth, Edmonton; M. S. J. Boulton, Lethbridge. (Not shown: K. Martin, Edmonton; R. L. McCarty, Edmonton.)

## Escape From Holland

Dutch Motor Boat Used By Eight Sailors To Reach England  
"Orange," a very plain, ordinary motor boat, is now part of the Dutch navy. Its achievement is that it crossed the Channel carrying eight brave Dutchmen—Jan, Klaas, Piet, Simon, Albert, Cornelis, Henk and Dirk—to safety to England. For months the friends, former officers in the Dutch forces, demoralized by the Germans, planned escape from their occupied homeland. They secured the Orange, carried it cross country by night to a creek, painted it grey, like a German ship, camouflaged her with weeds. One night with 60 gallons of petrol, after several false starts they got away from shore, rowing. Suddenly a German patrol boat loomed and a voice demanded who they were. Klaas replied, "We are from the German army, on special duty. Give the password." Just then Jan started the engine and the Orange charged off to England and safety.

## Destructive Weeds

The claim is made that, in the United States, the losses due to weeds are one and one-half times as great as those from animal diseases, plant diseases and insect pests combined. If approximately correct it is a strong argument for organized effort against weeds.

## SUNDAY SCHOOL LESSON

JANUARY 11

## THE INFANCY AND BOYHOOD OF JESUS

Golden text: Jesus advanced in wisdom and stature; and in favor with God and men. Luke 2:52.  
Lesson: Matthew 1, 2; Luke 1, 2.  
Optional reading: Psalm 119: 9-16.

## Explanations and Comments

The Presentation in the Temple, Luke 2:21-24. When the Infant Jesus was forty days old, his parents brought him to Jerusalem to "present" him to the Lord, in the temple of the first-born. See Exodus 22:29. The presentation to the Lord is an acknowledgment of God's claim, and by the payment of five shekels the babe was redeemed and given back to his parents. On the same day the rite of ceremonial purification was fulfilled by Mary, as in the Court of Women she presented to the priest her offering of a pair of turtle doves or of two pigeons. Had she not been poor she would have given a lamb for the burnt offering. Shown and the infant Jesus in the temple, the infant Jesus was presented to the priest her offering of a pair of turtle doves or of two pigeons. Had she not been poor she would have given a lamb for the burnt offering. Shown and the infant Jesus in the temple, the infant Jesus was presented to the priest her offering of a pair of turtle doves or of two pigeons. Had she not been poor she would have given a lamb for the burnt offering.

Simon was looking for the consolation of Israel—a phrase common among the rabbis for the Messiahic Age. Simon was looking for the Messiah who was to come in the period of great distress, and was given the gift of the Holy Spirit, the Consolator. To Simon it was revealed by the Holy Spirit that he was the Messiah, the Lord's Christ.

Simon's words to Mary, Luke 2:33-35. Joseph, who filled the place of a father to Jesus, and Mary his mother marvelled at Simon's words concerning Jesus, and Simon blessed them. Then to Mary he said: "Behold, this Child is sent for the falling and the rising of many in Israel, and for a sign which is spoken against." Some will reject him and "fall," sink spiritually, where others will accept him and "rise" to a high spiritual life. "Yes, and a sword shall pierce through thine own soul." This strong figure of speech can include all the sorrow that befell the Sorrowful Mother (Mother Dolores). It calls to mind Holman Hunt's picture, "Shadow of the Cross," where Mary has been looking into the coffin containing the gifts of the Wise Men, delighting her eyes with the beautiful crown and jewels, those gifts worthy of her wonderful Son, and then his turned her head to behold imprinted in the shadow on the wall her Son stretched out on a cross. "A sword shall pierce through thine own soul" is not too strong a figure for the experience awaiting her.

## Lessons From

Jan Ciechanowski (Polish Ambassador to the U.S. about air raids): "In a short time, people realize that they are as safe in their offices as they are anywhere else. If you are going to be killed by a bomb, worrying won't help. People realize this and lose their fear in a short time."

Some torpedoes travel under water until the shadow of a passing ship covers them and then they explode.

The latest gears for machines are made from plastics and they outlast the conventional metal ones.

Some are born great, some achieve greatness and some are satisfied to feel great. 2445

## BY GENE BYRNES

## Holds Many Honors

Commander of First Canadian Division  
Has Had Glorious Career

In that remarkable chapter of history which records the exploits of Canadian winners of the Victoria Cross in the last war, there is no finer instance of fighting leadership, no more inspiring illustration of the kind of courage that endures through great stress over a long period of time than that of "Fighting George" Peckes.

He was a constable on the Yukon Patrol when he broke out and a decision to trade his scarlet tunic for khaki. He brought his discharge from the R.C.M.P. in order to better his position by joining the Canadian Mounted Rifles at Vancouver as a private in 1915. He was a corporal and reached France in the autumn and became a sergeant in 1916. He was commended for personal bravery and commended in the field and won the Military Cross as a lieutenant later in the year. He won the Victoria Cross as a Major in 1917 and received the Distinguished Service Order and the Distinguished Conduct Medal. He finished the war with a lieutenant-colonelcy and immortality in the annals of British arms.

He is now Major-General Peckes, V.C., D.S.O., M.C., General Officer Commanding 1st Canadian Division.

The military career of "Fighting George" Peckes was thus replete with incidents which reveal a remarkable offensive spirit long before the course of war's tale brought his battalion to Passchendaele and Major Peckes to the death.

He received the coveted little bronze cross with the simple inscription, "For Valour". Erect, square-set, he stands as tall as his military boots. He is "Fighting George" to the ranks of the 1st Canadian Division, which he now commands; "a good egg" to his junior officers, a driver of himself and his staff. His hobby is his gun, and his passion is military science. Keen, cultured, always courteous, and even affable when off duty, he is popular with both the servicemen and the civilian.

His soldierly qualities already have had a far-reaching effect on his command, and there is no doubt that under his inspired leadership the 1st Canadian Division will gain gallant chapters to the history and tradition of "The Old Red Patch" when it finds its new battlefield.

## Super X-Ray Machine

Rheostion Is Twenty Times More Powerful Than Previous Apparatus

A new apparatus, named the rheostion, that produces X-rays travelling with energies of 20,000 volts, the most powerful yet developed, was announced the other day by the General Electric Research Laboratories at New York. The rheostion, it was said, opens up a new field of scientific exploration by its production of an electron stream far more penetrating than the electrons from radium.

"So promising have been the results obtained with the rheostion," the announcement said, "that the General Electric Research Laboratories at Schenectady have already started work on a large one designed to shoot electrons to an energy of 100,000,000 volts."

The most powerful X-ray machines in the world to-day, used in large hospitals, do not go beyond 1,000,000 to 1,200,000 volts.

The originator of the apparatus is Dr. Donald W. Ker, a 32-year-old physicist of the University of Illinois, who first designed a small model machine with the assistance of General Electric engineers. The present twenty-million volt model will be taken by Dr. Ker to his university laboratory for experimental work.

A doughnut-shaped glass vacuum tube, between the poles of a large electro-magnet, is the heart of the rheostion. Electrons from a hot filament within are whirled around the tube and steadily accelerated by electromagnetic force until they attain a speed closely approaching that of light, 186,000 miles a second.

## Charging Did Not Pay

A steel barbed a tranzer carrying a very bulky parcel. The conductor, riding the train, decided it was too big to be carried for free, so he said: "I'll be a penny for you, and threepence for your parcel."

Angry was stricken speechless for a moment, and then he stuck his elbow into the parcel and said: "Come out of that, we're steady, it's too cheap to carry down than for me to carry it."

By the year 1860 slavery had been abolished all over the world except in the U.S.

## Ideal British Army Doctor

Is Specialist Who Can Turn His Hand To Anything

The ideal British army doctor is a jack-of-all-trades and master of one. He is a "specialist who can turn his hand to anything," said a leading army doctor explaining the aims and training the British army gives its medical officers.

The training, based on experience of warfare in France, Greece, Italy and the Middle East, is designed to produce doctors who can look after the welfare of British soldiers under any conditions in any climate. More than 1,000 medical officers have been trained to deal with casualties of chemical warfare and one officer in every field medical unit has been trained in blood transfusion.

Special attention has been given to the organization of mobile medical units. Equipment now can be transported by motor, mule, camel, sled, or even dropped from the air. A hygienic dietetic works out problems of keeping soldiers fit and problems of food, water-supply, living conditions, clothing and effects of climate. Some 5,000 medical officers have taken courses in army hygiene.

An important development in army medical treatment has been the establishment of convalescent depots devoted to the physical rebuilding of soldiers whose health has deteriorated either as a result of wounds of illness.

At the depots, the men are given graduated physical training, electrical treatment, and occupational therapy. Most of the centres have small farms and some operate arts and crafts workshops.

Shortly before the war, the army established two physical development centres for men below service medical standard. The value of the centres was shown by a check of the records of 100 of the men put through the training treatment. Ninety-seven of the group later passed medical examinations and were admitted to the army. One got a commission.

Similar work now is being done with men formerly classed low standard. The army expects to be able to raise the categories of 70 per cent. of them.

## Working For Small Fee

Plastic Surgery Expert Leaves Private Practice To Help Soldiers

New faces for old. Two skins for one. If you think these things are impossible, says Gordon Sinclair in the Toronto Star, you've never talked with Sir Harold Gillies, New Zealand born adviser-in-chief on plastic surgery, the doctor in the British department of health.

Before the war Sir Harold was growing rich in London, lifting rich women's faces. Today he has led the heads of nine large clinics are rebuilding the faces of Britishers mutilated by bombs for nothing.

Since war's start, 28 months ago, Sir Harold has lifted the face of only one private patient and he does not plan to do any more. During that time he has rebuilt hundreds of noses, ears, lips, cheeks, and foreheads of mill run Londoners who had lost their faces.

Today he has the biggest of the heads of nine large clinics are rebuilding the faces of Britishers mutilated by bombs for nothing. ## TURNING ON THE HEAT

## Mites In Grain

Farm Stored Grain Should Be Examined Thoroughly

The food and feeding qualities of Canadian grains, an important factor in Canada's war time economy, should be safeguarded. As large quantities of grain are being stored on farms at the present time, it is important that the grain be examined at frequent intervals throughout the period of storage.

"Damp" or "rough" grain is especially susceptible to attack by mites, and serious infestations may occur during the winter months. In order to locate the mites early, the grain sample should be sifted over a screen of about 30 meshes to the inch. This will retain the grain and coarse dockage, and allow the dust and mites to pass through. The accumulated dust should then be spread out in a thin layer, preferably on a sheet of black paper. The mites are white in colour and are readily seen on a dark background, particularly if examined with a magnifying glass. If infestations are found, they should be reported to the Dominion Entomologist, Dominion Department of Agriculture, Ottawa, for further advice.

## Have Caused Casualties

The first wounded to return to Britain from the Libyan campaign disclosed the retreating Axis armies had left a trail of fountain pens and movie cameras filled with explosives and they had caused many British casualties. The pens exploded when the caps were removed and the cameras blew up when the cranks were turned.

## Earliest Man

Completing reconstruction of a Sterckfontein type of skull of the "Pleistocene" times. Dr. Robert Broom, P.R.S., is convinced the earliest links in the origin of man can be found in South Africa.

## Women Of Britain

Work Worth While, Takes The Place Of Life Of Leisure

After two years of war, Britain's women find that moments of leisure have been plucked one by one from their every day lives and in their place have been substituted work—worth while work.

Few women in Britain to-day are able or care to continue pre-war lives of late rising, with afternoon bridge or unburied shopping, and dinners followed by the enjoyment of good theatre. The past two years have brought war work—working in office duties or service in the women's armies—to those formerly carefree women. But they have well come, new purpose came into their lives and feel they have a part in Britain's great struggle.

To release as many men as possible for the armed forces and for heavy work in war factories, women are employed in jobs which before the war were exclusively men's. The postman has given way to the postwoman, his hand conductors have replaced the conductor, and the milk woman succeeds the milkman. Women are taking on all kinds of occupations and handling them successfully.

Housewives have a more difficult time of it than before the war. Fewer servants mean more housework to do and food rationing makes for more time and pushing over the days' menu. Meat is strictly rationed, fish is scarce and eggs even scarcer. The homes of many women have been bombed and their children have gone to safer districts in the country. However, husbands remain in the cities, billeted near their work. It all compels the war of life and death.

## Engaged In Debunking

British Expose War Rackets In Cosmetics And Food Substitutes

Local newspapers are engaged in debunking the cosmetic racketeers who have been exploiting the shortage of good cosmetics to force the sale of rubbishy liquid to rub the skin of the user for life.

To escape notice these racketeers purchase large stocks of elaborate boxes provided here before the war for use in France. These are sold with their contents at a high price. One newspaperman took a job in one of the fake factories for a peep behind scenes. He discovered that a mixture of beehives, horses, paraffin and water were put in a churn geared to different speeds. When the churn went at high speed the resultant mixture was a hair flaxine; at medium speed, a face cream emerged; at a low speed, while the mixture was still liquid it was mixed with brown dye and sold as leg tan to replace stockings.

Other rackets have been exposed in the production of substitute materials which harassed housewives were glad to purchase but which, on analysis proved to be lacking in nutritive value.

The government is meeting out heavy punishment, particularly to the producers of alleged substitutes. One of these, sold as a milk substitute, was found to be a concoction of flour, salt, bicarbonate and coloring.

## Race Horse Earnings

Horses Pay Higher Income Tax Than Humans Do

Few people know it but race horses pay more "income" taxes than humans do.

Provincial and federal treasuries took more than 200 per cent. of race horse earnings at Canadian tracks in 1941—about \$2,000,000, said R. James Speers of Winnipeg, honorary secretary of the Prairie Thoroughbred Breeders & Trainers Association.

"Every Canadian thoroughbred horse was responsible for contributing an average of \$1.00 to the government treasuries," he said. The collection were \$2,136,363 in parliamentary taxes—a 25 per cent. cut each at provincial and federal administrations—plus a five per cent. admission tax at tracks after July 1, 1941.

Purses won by the thoroughbreds totalled \$1,073,625.

## Reich Cuts Train Service

The German State Railroads announced that passenger train services throughout the Reich would be cut drastically. Virtually all trains for vacation travellers will be eliminated, and facilities will be available only for urgent official and business purposes.

## Greek War Fleet

With their country in the hands of the Nazis, the Greeks' war fleet of one cruiser, six destroyers, five subs and other war ships is being moved to the British fleet in the Mediterranean.

## Conserving Rubber

Man On Fancy Colored Rubbers And Good

Munitions Minister Howe announced that "without exception no rubber will be released in future for the manufacture of non-essentials."

No new passenger car tires will be manufactured except for the four first which will be made of non-essentials. No new spare tires will be allowed on new cars, and production of the car themselves will be greatly curtailed.

Rubbers, overshoes, and rubber boots may be made, but in staple lines of black rubber only. J. R. Nicholson, deputy controller of supplies, said the pan on white and brown overshoes and rubbers will conserve rubber inventories in the footwear factories.

The new regulations specify a long list of articles which the controller of supplies, Alan H. Williamson, may, in his discretion, designate as necessary for the war. There are absolutely essential civilian purposes. On this list of essentials are such things as golf balls, tennis balls, squashes, hockey pucks, plastic bands, rubber toys, and hundreds of other articles of which rubber is a major constituent.

## Have Proved A Success

Nurses In Britain Look After Children Of War Workers

Nearly one thousand nurseries are now being run by the Red Cross and nurses. Very many of them are wartime State nurseries brought into being by the call to married women to work in the war. There are simple Day Nurseries, caring for children whose mothers are absent only a few hours a day. There are "Children's Homes," where the evacuated youngsters stay permanently. There are special nurseries for children of workers who have been shaken by bombing.

In all of them, staffed by registered nurses and specialist nurses, are a success. In a typical centre, at Bilsby in Gloucestershire each child gained 10 lb. in weight. There are particularly nursery camps for cases, most of whom suffered from anaemia and malnutrition apart from emotional disturbance.

All the nurseries accept children irrespective of their nationality. Sylvia Linnell, for example, is a small Austrian girl of three who had to be taught again how to walk. Now she runs and is going to a nursery for normal children.

Brenda Macay, 2, bomb-shocked, could not bear to be touched at first. She was scarcely able to eat her food and she had night terrors. Now she is well and happy once more.

The Women's Voluntary Services, the British Red Cross and the American Red Cross has given it £465,000. St. Thomas Times-Journal.

## Nazi Prisoners Talk

One Urged Tightening Of British Blockade And More Bombings

Officials disclosed that German prisoners captured in Libya had alleged that Nazi Lt.-Gen. Erwin Rommel was planning a large-scale attack on the British forces because of the shortage of food and the lack of fuel. The attack was supposed to have been planned for Nov. 15. The Axis assault was to have included heavy attacks by dive bombers.

One prisoner, a man of 35 who voiced anti-Nazi sentiments, reported morale in Germany has been lowered as a result of the Russian campaign, but that the Gestapo still has control of the German people. The British officials said this prisoner urged tightening of the British blockade and intensified R.A.F. bombings of Germany in order to hasten the collapse of morale "for the sake of the German people and humanity."

## Horse Disappeared

Woman Riding Horse In Hyde Park Lost Her Mount

A horse on which a woman was riding in Hyde Park, London, suddenly sank through the roof, remained wedged in the surface for two or three minutes, then disappeared. It fell to the bottom of a 20-foot hole and was killed.

Miss Judith Morrison, the rider, threw herself clear when the horse sank beneath her, but she kept hold of the reins until the horse disappeared, having tried in vain to pull the animal out.

It is believed that the hole may have been caused by subsidence after a bomb crater had been filled in some months ago.

Kangaroo rats of the American Southwest can find no water without water.

More remedies for colds are offered and sold than for any other infection.

Owing to the illness of the teacher Miss M. Currie, pupils of Room 11 of the Carbon school had a holiday Tuesday and Wednesday.

Word received Tuesday by Chas. Graham stated that Mrs. Graham, who underwent an operation in the Drumheller hospital Monday evening, was progressing favorably.

Mr. and Mrs. Jas. Smith spent Friday and Saturday in Calgary.

William Ross, manager of the Builders' Hardware Store at Carbon, is assisting with stock-taking at the local branch. Bill is a former Olds resident and for some years prior to 1936 was a valuable member of the Olds Elks hockey club.—Olds Gazette.

**CARBON AND DISTRICT****NEWS NOTES**

FOR SALE—Purebred Shorthorn bull, Price, \$125.—Apply to Chris Dieck, sec. 5, 20 23, with Carbon, Alta. 2p

Stewart and Garrett Tigh of Didsbury visited in Carbon last Thursday with Mrs. Elliott.

Mrs. W. Leitch was a Calgary visitor last Thursday and Friday.

Born, on Thurs., January 8th, to Mr. and Mrs. Harry Woods, a daughter.

Mrs. Rudy Harney returned to her home in Edmonton on Tuesday after visiting in Carbon since the New Year with her parents, Mr. and Mrs. Wm. Leitch.

We learn that Adeline Martin, who returned from Calgary at Christmas time, will remain here with her parents, Mr. and Mrs. Chris Martin.

**WEDDINGS**

HEFFERNAN—LAVOIE

A pretty wedding was solemnized in St. Mary's Roman Catholic church, Beiseker, at 10 a.m. on Wednesday, January 7th, when Margaret Rita, second daughter of Mrs. Lavoie and the late Mr. Lavoie of Bircham became the bride of LAC Gerald Francis Heffernan, eldest son of Mr. and Mrs. Joseph Heffernan of Granger. Rev. Father Fitzpatrick of Strathmore officiated.

The bride, given in marriage by her brother, Wilfred of Beiseker, wore a floor-length gown of white crepe with a jacket of white lace. Her flowing veil was caught with three clusters of orange blossoms. She carried a bouquet of pink carnations. The bride was attended by her sister, Leona, who wore a gown of Nile crepe and a corsage of sweetheart roses.

The groom was attended by his brother, Joseph.

A reception was held at the home of the bride's mother with only immediate relatives present.

After a wedding dinner, given for their friends, the happy couple left for a honeymoon at Banff. On their return they will reside at Mossbank, Sask., where the groom is stationed.

SPRY—ARVIDSON

A pretty wedding was solemnized at the manse, Three Hills, at two o'clock on Christmas Day, when Clara Arvidson, second daughter of Mrs. Gerda Arvidson became the bride of Richard Spry, of Calgary, youngest

**Bullets for Britain****SAVE PAPER**

WASTE paper is a valuable war material—don't throw it away or burn a scrap of it. Canada needs it—it needs it badly—needs it NOW!

Paper wraps up the delectation charges in land mines . . . holds the charges of parachute flares in place . . . is used for wadding in cases . . . is used for wadding in cases . . . is used for wadding in cases . . .

Paperboard cartons are the most important shipping containers on this continent. They are made of waste paper. Shells, gas masks, munitions, field telephones, shell casings, food, clothing and other materials are shipped to England in these cases. Thousands of them must be made, and made quickly.

This ever-increasing demand is causing an acute shortage of waste paper. It's a shortage which you can overcome by giving it regularly to your Salvage Committee.

Help provide the shipping cases! Help get the tools! Start to Churchill! Start today.
